

Tennessee Crop Weather

Tennessee Field Office • PO Box 41505 • Nashville, TN 37204 • (615) 781-5300 or (615) 891-0903 • www.nass.usda.gov

Issued Tuesday 3:00 PM; June 04, 2018

For the Week Ending June 03, 2018

RECENT RAINS BRING VARIABLE CONDITIONS

Tennessee producers experienced multiple rain days with fluctuating amounts throughout the state. Fieldwork and other activities were halted during the 2.6 days suitable for field work. Some report concern for wheat and hay condition as lodging is present in some areas of the state. Others are finding great conditions with crops and cattle. Wet conditions are not helping the progression of hay cutting and tobacco setting. There is concern about the maturity of the hay. Topsoil moisture was 4 percent short, 66 percent adequate, and 30 percent surplus. Subsoil moisture was 1 percent very short, 5 percent short, 70 percent adequate, and 24 percent surplus.

CROP PROGRESS					CONDITION					
Crop	This Week	Last Week	2017	5 Year Avg.	Item	Very Poor	Poor	Fair	Good	Excellent

County Agent Comments

Overall, all crops are looking good. Wheat is drying down with harvest to begin soon. We still have a few acres of cotton and soybeans to plant. Delayed by rains. Ripley tomatoes are growing normally, as well. Cattle and pastures are in excellent condition.

J.C. Dupree, Lauderdale County

The farmers in Fayette Co. are waiting for dryer conditions to continue planting and spraying. Wheat is turning colors quickly.

Jeff Via, Fayette County

An extremely wet week with some minor flooding of river bottom crops. Multiple 2"+ rain events this week in many parts of the county. Corn and soybeans are looking good. Wheat crop lodging is evident due to thunderstorms and excessive rainfall.

Jeff Lannom, Weakley County

Poor cutting and curing conditions have put hay harvest behind schedule. Much of the forage still to be cut for hay is very mature and quality will be low. Some tobacco farmers are behind on getting the early crop set. We need some good dry weather (for a little while).

Ronnie Barron, Cheatham County

No field work this week. We have had rain somewhere every day. Some wheat and hay has lodged because of all the rain.

Larry Moorehead, Moore County

After recent rains last week, lots of hay being cut over the weekend.

Jason Evitts, Trousdale County

Much needed rain for Giles County, about 2 inches over the past week which slowed field activities.

Kevin Rose, Giles County

Rained every day this week. 2.2 inches total. No field work this week. Corn looks great. Hay is way too mature.

John Goddard, Loudon County

Rainy week has kept producers from making progress on first hay cutting.

Chris Ramsey, Sullivan County

It has been wet in Hawkins County the past week.

James Blake Ramsey, Hawkins County

Finally getting rain. The entire county has received rain. It has been very variable. Ranging from one inch to 4 inches according to gardeners and farmers who have reported in.

Neal Denton, Knox County
