

# Tennessee Crop Weather

Tennessee Field Office • PO Box 41505 • Nashville, TN 37204 • (615) 781-5300 or (615) 891-0903 • www.nass.usda.gov

Issued Monday 3:00 PM; November 19, 2018

For the Week Ending November 18, 2018

## RAINS CONTINUE TO DELAY HARVEST

The rains that fell last week continued to keep farmers out of their fields and again delayed progress on the harvesting of soybeans and cotton. The excessive moisture has also caused quality issues with these crops. Wheat planting was also put on hold by the rains. There were 2.2 days suitable for fieldwork last week. Topsoil moisture rated 1 percent short, 42 percent adequate, and 57 percent surplus. Subsoil moisture rated 1 percent short, 45 percent adequate, and 54 percent surplus.

CROP PROGRESS					CONDITION					
Crop	This Week	Last Week	2017	5 Year Avg.	Item	Very Poor	Poor	Fair	Good	Excellent
	Percent					Percent				
Corn – Harvested	100	98	100	99	Pasture	2	12	39	42	5
Cotton – Harvested	87	80	80	79	Winter Wheat	1	13	31	45	10
Soybeans – Harvested	74	72	82	86						
Winter Wheat – Planted	74	66	84	85						
Winter Wheat - Emerged	59	47	68	62						

### County Agent Comments

*The farmers in Fayette County had another week of week conditions and only got 2-3 days harvest. The wet conditions have caused quality problems in soybeans. Dry weather is needed to finish harvest. Wheat has been planted with some still deciding if they have time.*  
**Jeff Via, Fayette County**

*We still have some corn and beans in the field. It keeps raining and we cannot even get our wheat planted. This weather is making our feedlots muddy already.*  
**Larry Moorehead, Moore County**

*Low temperatures and past rainfall amounts have provided adequate soil moisture levels for both pasture and range conditions.*  
**David Cook, Davidson County**

*Rain has kept soybean producers out of the field for three weeks now.*  
**Kevin Rose, Giles County**

*Some row crop producers still have crops to be harvested. Have concerns about quality, but as they say "it is what it is."*  
**A. Ruth Correll, Wilson County**

*Inconveniently timed rainfall combined with cool temperatures has not allowed fields to dry down and thus has kept harvesters and planters out of the fields for most of November. On the other hand, cool season pastures are looking great and, in turn, producers may be able to extend grazing on their pastures and put off feeding hay (though not in short supply) a little while longer.*  
**Matthew Deist, Marion County**

*2.25 inches of rain this week. Ground is wet. We need a few days of sunshine to finish up bean and corn harvest. We had ice one morning this week.*  
**John Goddard, Loudon County**

**TEMPERATURE AND PRECIPITATION**  
**For week ending: November 18, 2018 (with comparisons)**
