

Tennessee Crop Weather

Tennessee Field Office • PO Box 41505 • Nashville, TN 37204 • (615) 781-5300 • www.nass.usda.gov
In Cooperation with Tennessee Department of Agriculture

Issued Monday 3:00 PM; April 11, 2016

For the Week Ending April 10, 2016

SOYBEAN PRODUCERS PREPARE FOR PLANTING

Cool, wet weather continued to slow corn growth. Soybean producers made burndown applications to their fields in anticipation of planting. Fruit producers were concerned about freezing temperatures predicted for the weekend. Cattle producers had for the most part stopped feeding hay, instead shifting to spring pastures. There were 4.4 days suitable for field work. Topsoil moisture was 6 percent short, 73 percent adequate and 21 percent surplus. Subsoil moisture levels were 4 percent short, 77 percent adequate, and 19 percent surplus.

CROP PROGRESS					CONDITION					
Crop	This Week	Last Week	2015	Five Year Avg.	Item	Very Poor	Poor	Fair	Good	Excellent
	Percent									
Corn – Planted	17	6	4	16	Wheat	0	2	16	58	24
Wheat – Jointing	55	30	39	54	Pasture	2	8	33	49	8
Apples – Full Bloom	59	24	43	38						

County Agent Comments

Wheat continues to progress well without any serious problems. All wheat is jointing but growth has slowed down some due to cooler night time temperatures. Corn planting progressing slowly due to frequent rain showers. Emergence of corn has slowed due to low night temperatures. Dyer County is still facing flooded ground issues due to frequent and significant rain events within the county as well as in neighboring counties. Surface runoff via the Forked Deer River and the Obion River supports continuing flooding issues for Dyer County.

Tim Campbell, Dyer County

Low temperatures and wet weather have impeded corn planting and growth. Most cattle producers have stopped feeding hay and are taking advantage of spring green-up by utilizing rotational grazing.

Justin Hargrove, Benton County

The farmers are busy planting corn where they can. A front moved in Wednesday afternoon bringing blowing winds and hard rains. It moved through quick and some were planting the next morning.

Jeff Via, Fayette County

Producers are making burndown applications. As conditions dried, corn planting continued.

Walter Battle, Haywood County

Producers took advantage of sunny conditions and planted a few more acres of corn this week. Rain showers mid-week prevented field work for only one or two days. Wheat is progressing and looks very good. The upcoming cold snap this weekend may affect the wheat crop development depending upon low temperature readings.

Jeff Lannom, Weakley County

We had more rain last week and another few days of cold weather that slowed things down.

Larry Moorehead, Moore County

Field work is slow and working around the wet spots. Grass is growing and lots of spraying.

A. Ruth Correll, Wilson County

Drier conditions first half of the week allowed corn producers to plant and prepare more ground. Showers mid-week produced from 0.4 to 0.5 inches of rain. Temperatures remain slightly cooler, a cold front at week's end produced lows in the 30's. The wheat crop continues to progress with late planted fully jointed and early planted in the boot stage. Corn planting is in full swing, but a few acres will need to be replanted from damage due to heavy rains the week before. Producers are also busy readying soybean acreage for early beans. Cool season pastures are beginning to keep up with grazing pressure.

Ed Burns, Franklin County

Corn planting is near 50% completed, but with fields still a bit wet and rain in the forecast it could be next week before the remaining acreage is planted. Temperatures dropped dangerously close to freezing and almost dropped low enough to damage wheat that had already jointed. Livestock and pastures look good and how they should for spring. You all have a great week.

Matthew Deist, Marion County

Weather in Overton County was very cold the past week with some rain.

David Bussell, Overton County

27 degrees predicted for this weekend has fruit and vegetable folks concerned.

John Goddard, Loudon County
