¹ Data Provided by Ryan Blair, Ext. Area Specialist, Grain and Cotton Variety Testing, and Extension agents in counties shown above.
² Hybrids that have any MS letter in common are not significantly different in yield at the 5% level of probability.
³ Hybrids marked with an asterisk were in the top performing "A" group for two (*) or three (**) consecutive years within the previous three year evaluation period.
⁴ All yields are adjusted to 15.5% moisture.
