Yields have been adjusted to 13.5% moisture. Each variety was evaluated in a large strip-plot at each

location, thus each county test was considered as one replication of the test in calculating the average yield

Statistical analysis conducted at 95% confidence interval. Varieties with the same MS letter are not significantly different.

Official test weight of No. 2 wheat=58 lbs/bu. TWT = Avg. Test Wt. lbs./bu @ 7 locations.

% ≥ Avg. is the % of locations that variety is at or above the field average.

UT Extension provides equal opportunities in programs and employment.
