<b>Average</b>		<b>68.6</b>	<b>11.1</b>	<b>70.4</b>	<b>78.0</b>	<b>49.8</b>	<b>80.7</b>	<b>61.3</b>

‡ Data Provided by Ryan Blair, Ext. Area Specialist, Grain and Cotton Variety Testing, and Extension agents in counties shown above.

† Varieties that have any MS letter in common are not significantly different at the 5% level of probability. Values highlighted in light orange are highlighted in dark orange are in the "A group", indicating no statistical difference from the top-performing variety, for a given trait.

\* Asterisks after a name indicate the number of preceding consecutive years in the top-performing "A" group.

§ All yields are adjusted to 13% moisture.

County Locations include: Benton, Crockett, Dyer, Gibson, Henry, Lauderdale, Madison, Marion, Meigs
